Rainfall was near average with .5' - 1" across Jackson and Swain counties with near average temperatures for the period..

Robert Hawk – Jackson/Swain County Extension

Rain wet weather some soybeans still in the field.

Gary Cross – Person County Extension

Early November freeze stunted some over-seeded pastures, delayed emergence of small grains, and was not helpful to recently planed strawberries. This had been preceded by an unusually hot September-October, that delayed overseeded pastures.

Taylor Williams – Moore County Extension

Harvest is complete for most crops. Field work has begun. Wet weather has set in and slowed what little work is being done.

Daniel Simpson – Pamlico County Extension

Rains continue to delay all field work

Mike Carroll – Craven County Extension

Some dry weather allowed farmers to push to complete soybean harvest. Late season bean yields are about the 30-35 bushel average for the county. Saturday night's heavy rains will delay the completion of soybean harvest at least another 3-5 days. Above average temperatures and adequate rainfall have spurred wheat growth across the county.

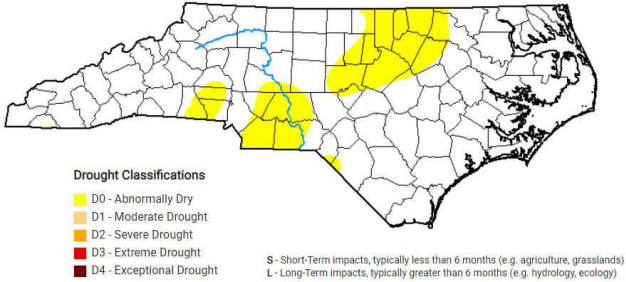

Mark Seitz – Pender County Extension
